SUMMARY

Computer Science graduate transitioning into Data Engineering. Currently pursuing the IBM Data Engineering Professional Certificate with focus on SQL, Python, ETL, data pipelines, and cloud concepts. Seeking entry-level opportunities to build expertise in data systems and analytics infrastructure.

TECHNICAL SKILLS

SQL (Learning), Python (Learning), Data Pipelines (Learning), Database Design, ETL Concepts, Git, GitHub, Firebase, OOP

PROJECTS & CERTIFICATIONS

IBM Data Engineering Professional Certificate (In Progress)

- Coursera / IBM
- Topics: SQL • Python • ETL • Data Pipelines • Cloud Concepts • Data Warehousing

Ascend — Fitness & Nutrition Platform

- Managed database structure for user tracking features.
- Supported deployment workflows and feature planning.
- Contributed to backend-related planning using AI-assisted workflows.

SentiCore — Predictive Maintenance System (Graduation Project)

- Developed a system to predict equipment failures using historical data.
- Contributed to data processing and system architecture using historical datasets

EXPERIENCE / INTERNSHIPS

Quality Assurance / Software Testing Part Time – Phantasm Apr 2023 - Jan 2024

- Tested web and mobile applications to identify functional and UI bugs.
- Documented reproducible bug reports and collaborated with developers to verify fixes.

Customer Relationship Management (CRM) Intern - Misr Italia Jun 2023 - Jul 2023

- Handled client issues and inquiries in person, ensuring professional resolution and follow-up.
- Managed customer contracts and coordinated cheque processing.

Administrative Operations Intern - Misr Italia Mar 2022 - Jun 2022

- Managed daily operations for an office building in coordination with the sales department.

EDUCATION

B.Sc. in Computer Science (Software Engineering) Mar 2020 - Jan 2026

- Arab Academy for Science, Technology & Maritime Transport (AASTMT), Sheraton
